(54) HOT MELT ADHESIVE

(57)Abstract:

PROBLEM TO BE SOLVED: To not only impart and allowable acceptable level of adhesion to a hot-melt adhesive but also improve the permeating properties thereof in a specific final application without decreasing the capacity or rate of absorption by an absorbent by compounding the hot-melt adhesive with a specified amt. of a nonionic fluorochemical surfactant.

SOLUTION: 100 pts.wt. hot-melt adhesive is compounded with 0.1-10 pts.wt. nonionic fluorochemical surfactant to improve the permeating properties of the adhesive. An example of the surfactant is a mixture comprising 86-89% 8C-fluoroalkyl alkoxylate, 9-10% 8C-fluoroalkylsulfonamide, 2-4% 7C-fluoroalkyl alkoxylate, and 0.1-1% 7C-fluoroalkylsulfonamide.

## LEGAL STATUS

[Date of request for examination]

26.10.1995

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the  
examiner's decision of rejection or application  
converted registration]

[Date of final disposal for application]

[Patent number]

2648295

[Date of registration]

09.05.1997

[Number of appeal against examiner's decision of  
rejection]

[Date of requesting appeal against examiner's decision  
of rejection]

[Date of extinction of right]
